

FOR ULTIMATE FRESHNESS & CLEAN FLUSH WATER

WHY: For a fresh and clean start and optimal performance of **Aqua Rinse Plus**, clean your flush-water tank **before the first use** by following these instructions.

WHAT NEEDED: Household bleach + bucket/watering can

HOW:

1. Prepare a solution using 100ml household bleach per 10L of flush-water tank capacity. Prepare as much solution as needed to completely fill your flush-water tank.
2. Fill the flush-water tank completely with the prepared solution.
3. Leave it in for 24 hours.
4. Drain the flush-water tank by using the drain tube or flushing system.
5. Then fill the flush-water tank completely with fresh water and leave it in for 5 minutes.
6. Drain the flush-water tank again.
7. Repeat step 5+6 to make sure no bleach is left behind.

Note:

- Do not use together with other products.
- Exceeding the stated dose or recommended duration could damage your Thetford toilet.
